

WINDOWS USERS SKIP THE STEPS ON THIS PAGE

A screenshot of a macOS terminal window. The title bar shows a home icon, the name 'Arcadio', and the shell '-bash' with dimensions '80x24'. The terminal content shows the last login time and the execution of a 'mkdir' command to create a directory for internet plug-ins.

```
Arcadio — -bash — 80x24
Last login: Tue Mar 27 08:59:50 on console
nbp-64-165:~ Arcadio$ mkdir ~/Library/Internet\ Plug-Ins
```

- **MAC USERS ONLY:** open up terminal and type in this command: `mkdir ~/Library/Internet\ Plug-Ins`
- Hit enter
- Close terminal
- Proceed with normal set up

- Click the provided link
- Fill in your name and e-mail address (your name will be displayed how you type it)

Step 1 of 2: Add WebEx to Chrome

Follow this one-time process to join all WebEx meetings quickly.

1

2

Select **Add WebEx to Chrome**.

Select **Add**.

Add WebEx to Chrome

Don't want to use an extension? [Run a temporary application](#) to join this meeting.

Add "Cisco WebEx Extension"?

★★★★☆ (1605)
10,000,000+ users

It can:

- Read and change all your data on the websites you visit
- Communicate with cooperating native applications

[Open in Web Store](#)

- Add WebEx to your browser
- Agree and click appropriate buttons to add WebEx and the needed components to run the extension in your browser

- On the audio and video connections screen you will not need to select anything
- Underneath the “Connect Audio and Video” click the word skip
